Description

A method of treating corns with soaking and the application of plant leaves or an adhesive plaster, No. 104, p. 62.

Transcription

A Cure for Corns,

The whole cure consists in Softning the Corns,
by Repeated washings of the feet in pretty hot
water, then in Cutting them when soft^{ened} with a
penknife or scissars, without wounding the Sound
parts, and next in applying a Leaf of house:
:Leek, of ground ivy or of purslain dipt in
Vinegar, upon the part, or he that has corns
may apply a plaister of Simple [diachylon](#), or
Of Gum ammoniacum softened in Vinigar,

Annotations

[Leek](#)

The succulent houseleek is a sempervivum used to treat skin disorders and diarrhea.

[Diachylon](#)

An adhesive plaster made from oil and a variety of plants. Now commonly referred to as lead plaster.
